DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 2, 3, 5-7, 14, 15, and 20-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- ✓ In claims 2, 3, 21 and 22, “wares” is confusing and inapt: perhaps “wears” is intended.
- ✓ In claims 5, 6, 24, and 25, use of “that” time is indefinite, as no time has been established. Use of “a current time” or “a real time” would be more precise.
- ✓ Claims 14, 15, 33 and 34 are confusing in that they refer to a “rule”(singular), while antecedent has been defined for “rules”(plural). “One of said rules” is more exact.
- ✓ Claim 20 includes the structure “rule memory” which is not referred to in a step and as structure, it is unclear if/how it is meant to be limiting to a method claim. Perhaps the step of storing was intended. Further, each of claims 24 - 27², 31, 32, 35 and 36 appear to recite only structural limitations rather than further defining or presenting new method steps. Rephrasing into proper method steps is suggested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11, 14, 15, 17-19, 20-30, 33, 34, and 36 - 39 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Jarvik.

The Jarvik system integrates virtual reality with real-time sensed physical reality to provide a unique hybrid environment, as claimed in the instant claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 13, 16, 31, 32, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jarvik.

Jarvik gives exercising examples, but suggests his systems use in a game environment. He does not explicitly state different types of games, such as recited in these claims. However, enemy

games, fighting games, cooperative games, danger games, and the like are all well known genres of games, each having their own scoring schemes determined by game designers. It would have been obvious to one of ordinary skill in the art at the time of the invention to adapt well known game genera and scoring schemes to the Jarvik system, in order to provide a variety of virtual experiences to the Jarvik system. Specific recitation of a type of score or game, when such are well known in the game art, would not serve to define patentability given the analogous technology and suggestions of game embodiments in Jarvik.

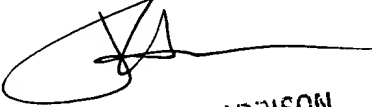

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional art relates to similar VR game systems.
